† Maximum pages per minute (PPM) are measured after the first page and are based on text patterns, in the draft mode, with plain paper. Time of printing varies, depending on the configuration of the system, the software used and the complexity of the page. The normal ISO ppm printing speed in black and color is measured in the default mode, in one side printing, according to the ISO ppm international standard, ISO / IEC 24734 standard. For more information go to www.latin.epson.com/speed †† Black and color copy speeds are determined in accordance with ISO / IEC 29183. Times of actual copies will vary depending on the system configuration and complexity of the page. For more information, visit of actual copies will vary depending on the system configuration and complexity of the page. For more information, visit I 1. Part of the ink of the included bottles is used for the initial configuration, so the yields are lower than the replacement ink bottles. Yields of replacement ink bottles are based on the ISO / IEC 24712 standard using Epson methodology. The yield of such by-products can vary considerably due to issues that include printed images, configurations of printing, temperature and humidity. Yields may be lower when it is not printed frequently or when printing mostly with only one ink color. All ink colors are used to print and maintain the printer. For more information, visit www.latin.epson.com I 2. Estimated about 35 sets of cartridges based on the print yields of the black ink and replacement color bottles compared to standard ink capacity cartridges for cartridge printers with similar characteristics from the main manufacturers to July 2017 I 3. The comparison of savings is based on the cost of purchasing the replacement ink bottles and the cost of sufficient cartridges to achieve the total performance highest for consumer inkjet printers sold in Latin America and with similar characteristics and prices of $ 150 USD or less. According to syndicated data sources from the third party industry to July 2016, in the last 12 months. I 4. Most of the functions require an Internet connection to the printer, as well as an Internet-enabled device and / or email. For a list of compatible printers with Epson Connect and compatible devices and applications, visit www.latin.epson.com/connect I 5. The standard warranty is 0 to 3 months with no page limit and from 4 to 12 months or 25.000 copies (whatever happens first). To obtain an additional 12 months (total of 24 months guarantee) or up to 50.000 copies (first about the Extended Warranty program, visit www.latin.epson.com/garantia I 6. Wi-Fi CERTIFIED™; the level of performance depends on the scope of the router used. Wi-Fi Direct may require I 7. Windows® Server OS only supports printing and scanning I 8. Some applications or functions may not be available in Mac OS® X I 9. Internet access required to install drivers and OS X software I 10. Energy savings is compared to A4 laser printers and multifunctionals (1-20 ppm ISO color and 1-30 ppm mono) of best selling in Latin America with prices of up to $ 499 USD, in September 2017, based in the manufacturer's operating voltage specification. The exact energy saving will vary according to the use of the product.
